

**Group introduction:**

The intelligence group of paramedical faculty started its independent activity since 1372 with the training of intelligence students at the associate level. Currently, this group has 4 faculty members and 3 intelligence experts, and it has continuous undergraduate students. The courses related to the field of intelligence, including theoretically and practically, are taught by the faculty members of the department. The number of intelligence students in this group is about 120 people in 8 different semesters. Internship in the field of mental health students takes place in the form of a written program, in groups of 5 people, with the presence of faculty members and the cooperation of experts from different departments of medical training centers in 8 medical training centers. Evaluation of students in theoretical courses is done in the form of mid-semester and end-of-semester exams, and practical courses and internships in the field are done in the form of an organized clinical exam.

**Message from group manager:**

Hushbari Department is one of the educational departments of Paramedical Faculty which provides its educational and research services in order to improve the academic level of students. Today, an all-out effort is made at the global level to train people in various fields as best as possible to provide high-standard services to clients. Acquiring skills and knowledge will prevent unwanted complications and accidents. Faculty members and experts of the Department of Intelligence of Tabriz Faculty of Paramedicine also devote all their efforts to the best possible training of intelligence students so that the graduates of the field of intelligence with clinical knowledge and skills can serve the patients of the society. I hope that the efforts of faculty members and group experts in teaching students and the perseverance and effort of students will satisfy patients and members of society.
